Important Meaning of TLBU Infant King Family

Since TLBU Newsletter is Infant King Family News, many members wonder what Infant King Members should be, and What difference between TLBU alumni and TLBU Infant King Family Members should be.

As TLBU Global System should be in progress in USA and Europe, and TLBU Global Mission projects including trade, law firm networking, and other business projects, should be active, many of TLBU Family members are expected to involve in business relationship with other members or with TLBU in Washington, TLBU in NY-NJ, TLBU in Paris, and TLBU in other area. Since the history of TLBU is already more than 13 years, many members do not know each other nor one another. If it is simple social or friendly relation, then it should be not any problem, but doing business with other members should be serious and sometimes very risky. Most probably many members of TLBU Family may

have tendency of strong trust toward other members. Therefore we need certain guarantee system to prevent any damage or loss. Even though many of TLBU Family members are good and trustful people, but still a few people would not be desirable person to do business together or to have partnership of business projects.

For practical purpose to protect innocent members, I like to re-organize Infant King Family members, excluding certain potential trouble makers. Soon we will publish the members of TLBU Infant King Family Members through Infant King Family News. And we will welcome only Infant King Family members to link TLBU in Washington or TLBU in NY-NJ, or TLBU in Paris, and TLBU in Seoul for business purpose.

Let us pray for TLBU Mission.

I love all of you.

Lyou

A new milestone in TLBU history

The New Program in TLBU Global School

grade and 6th grade) and Middle School (7th grade and 8th grade). What worth noted is that the education will be provided in English and in accordance with American Educational program and textbook.

Considering these students' origin and language, Chinese is their mother tongue; therefore, one subject in Chinese

will be provided. What's more, to enlighten the relationship with other Korean students in GS and to have a high quality life in Korean, Basic Korean language will also be included in the curriculum. Other subjects will be deliberately designed under the Korean Law for the development of the future leadership training.

Recently, President Lyou Byung Hwa has initiated the TLBU Global School New Educational Program for Chinese Children, which will be started from 2014 Spring Semester.

This is a special program for recruiting new Chinese students to study in Global School of TLBU. This program covers Elementary School (5th

The initial plan for the recruitment is to enroll 15 persons for each grade (in total 60 persons) and the entrance fee will be 7,000\$.

The most special point in this program is that all the students will have chance to have field study annually in US or Europe. This is a wonderful opportunity to have a better understanding of the foreign cultures and foreign systems.

Currently, there is one Chinese girl, Wang Yajun studying in Global School and she adapts well with her classmates with the help of teachers and friends. However, the gap of language and culture still forbids her from deeper knowledge gaining. She said she can understand Korean and English well so there's no big problem in understanding the communication or class, but she

dares not to speak out because she is afraid that her Korean classmates may laugh at her. She'd rather speak English with them even when they reply in Korean.

This underlies the very initial idea of this program – a special design for the Chinese students to have a carefree study environment in Korea. Young kids tend to make friends under the similar background and the reason why kids like Wang Yajun would rather speak English is that in her mind, she and her friends share the same level in English but utterly different in using Korean. This special plan may provide kids like Wang Yajun a stage to learn together under the similar background. It is highly likely that they will be able to learn and understand culture and knowledge more efficiently.

We are quite sure that this program may attract some potential parents including those who have business in Korea or have interest in Korean to send their kids here in TLBU. Wish this program might have a very bright future.

This program is a limestone for TLBU Global School for it opens a gate for the international development of TLBU Global School and most essentially, it broadens a new resource for generating revenue for our financial fund. This program is so important that President Lyou decided to reward one thousand dollars for each kid if alumni successfully recruit the potential candidates. For detail information please pay attention to the public website of TLBU later.

Stories of Infant King Members

Alumna DONG Yanqing, one of the Infant King Mmbers from entering Year 2 (2002), is now working as a lawyer in Beijing Zhongkai & Partners, specialized in contract, corporation as well as marriage and family law area. In 2013 Volunteer Contribution of Infant King Family, Alumna DONG not only donated \$1,000 herself but also worked as one of the coordinators to help to run this campaign successfully and smoothly. With her contribution and devotion, we TLBU students can communicated with Infant King Family Members of Entering Year 1(2001) through E-mails and Skype calls.

Alumna DONG didn't come from a substantial family, which notwithstanding built up her modest and optimistic personal character in her life. During her living and studying in TLBU, she did what she could to enrich her life and took care of our dear President. As our dear President mentioned about Alumna DONG, “before I just knew she as a strange looking little girl, but later she turned out to be a very strong minded TLBU member. She is a very good person.” During her stay in TLBU, Alumna DONG cared about every one of her class with her good heart, which

leaves a deep impression on her classmates. Her good personal character is admired by them till now.

After her graduation from TLBU, she started to practice law since 2010 and began to take lawyer as her new career. Although she is in late 30s now, she thinks herself to be a new comer in

the professional law practice area and always learn the glittering points from others in her work. Therefore, it is hard at her beginning, especially considering she should also take care of the little kid. However, as her touching email said, “I think I overcame the most difficult time with strong will and hardworking spirit, which were strengthened through my TLBU life,” which inspires us TLBU

students now to treasure the time for the time being.

For us TLBU senior and junior students now, Alumna DONG also encourages us, since we are much younger, more energetic and creative. We have much more hope in life to gain successful career and happy personal life as long as we don't give up but work hard by facing whatever difficulty situations. As was written in her email, “Make full

use of the time, material and condition of TLBU, and study hard, work diligently with patience, tolerance and love. It is for sure that your future will be much brighter than mine!” Let us TLBU students all remember her warm words.

Alumnus EN Sopheap, one of the TLBU Members from Cambodia entering year 2005, reminisces about his meaningful time in TLBU. Successfully working as a professional Lawyer and handling a dominant position as the Managing Director at Nokorsamreth Hotel, Restaurant & Clubs, Alumnus En Sopheap has always been expressively proud to introduce himself as one part of the TLBU Community. In addition, He confidently stated that the integral part of his success in his career basically resulted from the 2-year knowledge and fruitful experience in TLBU which will never fade away from his mind. This great opportunity to experience life has keeps him revoking the old memory of the school particularly classrooms,

libraries, dorms, and other activities he had done with his good friends. He added that, “Besides absorbing a good quality of Knowledge, I have a lot of friends from various countries, and up to now, we still keep in touch and this has built up a very good and valuable network”.

The Infant King Family member En Sopheap has also marked a major image in the Voluntary Contribution Campaign among the non-Chinese Alumni. By acknowledging a call from the TLBU President upon the voluntary contribution campaign, Alumnus En Sopheap immediately remitted \$2000 fund without a bit of reluctance. “My contribution is a very small amount if compared to what I gained from TLBU, but it is a token of

my love and gratitude to Mr. President and TLBU; I do profoundly respect him as a wise professor, an inspired leader, and a good father”, he said. So far, having had graduated even more than six years from TLBU, he always reiterates that TLBU is forever in his heart, and President Lyou is the special inspiring model of his success.
